

REMARKS

Claims 1-18 are pending in the present application. Claims 1-18 are rejected under the judicially created doctrine of obviousness-type double patenting. Applicants respectfully request reconsideration of the application, withdrawal of all rejections, and allowance of the application in view of the amendments and remarks below.

The Invention

The present invention provides novel condensation drug aerosols and methods for producing such aerosols. These condensations aerosols have little or no pyrolysis degradation products. The unique method for generating or producing such aerosols employs rapid vaporization of the drug to minimize drug degradation during the process. These vaporized drugs are subsequently condensed to form particles of a desirable particle size for inhalation. These aerosols are especially useful in the treatment of acute or chronic conditions wherein rapid onset of treatment is desirable.

The Amendments to the Specification

The specification has been amended, at paragraph [0107], to note a calculated thickness of frovatriptan thin layer, on a 24.5 cm² aluminum-foil solid support, of about 2.0 microns, based on an assumed drug density of 1g/cc.

The specification has been amended, at paragraph [0109], to note a calculated thickness of a frovatriptan thin layer, on a 24.5 cm² aluminum-foil solid support, of about 2.0 microns, based on an assumed drug density of 1g/cc.

The amendments to the specification at paragraphs [0107] and [0109] are the same amendments that were entered with respect to the parent U.S. patent application Serial No. 10/155,705, now U.S. Patent No. 6,805,854.

It is well-established in the case law that amendatory material is not new matter where it is concerned with an inherent characteristic of an illustrative product of an invention already sufficiently identified in the original patent disclosure. (*In re Nathan, Hogg, and Schneider*, 140 USPQ 601 (CCPA, 1964); In *In re Reynolds*, 170 USPQ 94 (CCPA 1971) the CCPA cited with approval the following holding from *Technicon Instruments Corp. v. Coleman Instruments, Inc.*, 255 F. Supp. 630, 150 USPQ 227 (N.D. Ill. 1966):

By disclosing in a patent application a device that inherently performs a function, operates according to a theory, or has an advantage, a patent applicant necessarily discloses that function, theory, or advantage even though he says nothing

concerning it. The application may be amended to recite the function, theory, or advantage without introducing prohibited new matter.

This principle has been endorsed by the CAFC, e.g., in *Kennecott Corp., v. Kyocera Int'l Inc.*, 835 F. 2d. 1419, 5 USPQ2d 1194 (Fed. Cir. 1987).

The amendatory material regarding the assumed density of the drugs is already stated in the specification, e.g., see paragraph [0107] which states “ . . . multiplied by the density of the drug (taken to be 1 g/cm³).” Additionally, the thickness of the coating would be readily derivable by a person skilled in the art of the claimed invention by multiplying the mass of the material by its density and then dividing this by the surface area over which it is coated. As stated above information regarding the density is readily available from the specification and other recognized sources (e.g., the CRC Handbook of Chemistry and Physics, the Aldrich Chemical Catalog, etc.) and can be assumed to about 1g/cc. The drug masses and substrate areas are also disclosed in the specification. This information is all that is needed for one to calculate the thickness.

Thus, no new matter is introduced by these amendments to the specification. The Examiner is respectfully requested to enter the amendments to the specification.

The Amendments to the Claims

Without prejudice to the Applicants' rights to present claims of equal scope in a timely filed continuing application, to expedite prosecution and issuance of the application, the Applicants have amended Claims 1, 4, 7, 10, 13, and 16 and cancelled Claims 2, 3, 5, 6, 8, 9, 11, 12, 14, 15, 17 and 18. The amended claims are supported by the specification (see below for examples of such support).

Claim	Examples of Support in the Specification
Claim 1	Paragraphs 0006, 0008, 0015, 0017, 0019; Example 2
Claim 4	Paragraphs 0006, 0008, 0015, 0017, 0020; Example 2
Claim 7	Paragraphs 0006, 0008, 0015, 0017, 0021; Example 2
Claim 10	Paragraphs 0024, 0027, 0030, 0019; Example 2
Claim 13	Paragraphs 0024, 0027, 0030, 0020; Example 2
Claim 16	Paragraphs 0024, 0027, 0030, 0021; Example 2

The amendments to the claims do not introduce new matter. Applicants respectfully submit that the amendments to the claims put the case in condition for allowance. The Examiner is respectfully requested to enter the amendments to the claims and allow all amended claims.

Double Patenting

Claims 1-18 were provisionally rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 7-15 and 22-30 of copending Application No. 10/766,574. Office Action at 2.

As amended, Applicants submit that claims 1-18 of the present application and claims 7-15 and 22-30 of copending Application No. 10/766,574 are not coextensive in scope.

Also, Claims 1-9 were provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 11, 13 and 16-21 of copending Application No. 10/735,496 as these claims are “either anticipated by, or would have been obvious over, the reference claims.” *Id.* at 3.

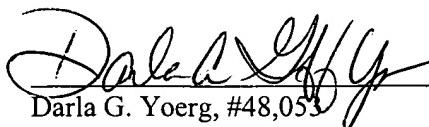

Applicants have filed with this response a Terminal Disclaimer with regard to copending Application No. 10/735,496. Applicants believe that this addresses the Examiner’s concerns and respectfully request reconsideration of the application, withdrawal of all rejections, and allowance of the application in view of these actions and remarks.

Conclusion

The Applicants appreciate the Examiner’s careful and thorough review of the application and submit that the Examiner’s concerns have been addressed by the amendments and remarks above. The Applicants accordingly request the Examiner to withdraw all rejections and allow the application. In the event the Examiner believes a telephonic discussion would expedite allowance or help to resolve outstanding issues, prosecution of the application, then the Examiner is invited to call the undersigned.

This constitutes a request for any needed extension of time and an authorization to charge all fees therefore to deposit account No. 19-5117, if not otherwise specifically requested. The undersigned hereby authorizes the charge of any fees created by the filing of this document or any deficiency of fees submitted herewith to be charged to deposit account No. 19-5117.

Respectfully submitted,
